

Vision: people connected to, nourished by, and working in harmony with, the natural environment to produce and eat local food

Mission: to run a community farm providing natural, nutritious food for local people and a place where they can connect with food growing, the land and each other

Intended impact: Better health of local people and the natural world

Key:

**Outputs
(products or
services)**

**Outcomes
(changes or
benefits)**

Less CO2 produced/local people have a reduced carbon footprint

The natural site is full of diverse life

People have improved wellbeing

People eat more seasonal, nutritious, nourishing food

People do more outdoors or feel more connected to nature

People know more about natural food growing, processing and working with natural materials

More people eat food that is grown locally and naturally

People feel more connected to where their food comes from

People feel a greater sense of belonging and purpose

Food growers have a more stable livelihood, supported through all seasons

More food is grown with respect and support for biodiversity, wildlife habitats and the natural world

Volunteers feel better able to develop and realise their own potential

People meet new people and feel more connected to others in their local community

Members can have more of a say over the system of their food production

Regular veg box scheme

Opportunities to get involved in food growing

Seasonal events and celebrations

Space for regular activity groups

Community membership scheme
